

Clear Creek Flood Mitigation (Idaho CD)

Program	Riparian Improvements
Lead Implementer	Idaho County Conservation District
Funders	Idaho Water Resources Board, Private Party, Unknown
Other Organizations	Idaho Soil and Water Conservation Commission
Project Primary Contact	Stefanie Hays (stefanie.hays@id.nacdnet.net)
Project Stage	Completed
Duration	2021

Natural Resource Projects & Practices ➤ Riparian Improvements

The spring 2019 flooding in Clear Creek was estimated at a 100-year flow event (NOAA). The goal of the project is to mitigate flood damage to the bank on property 2, while establish flood protection for future flooding. Stabilizing the bank will decrease sediment inputs to Clear Creek, improving water quality and fish habitat. Technical Assistance hours specific to this project were 54.5 hours (captured in the combined TA project for Clearwater, Lewis and Idaho Districts).

Key Accomplishments

- Streambank & Shoreline Protection (linear feet): **215.00 lf**

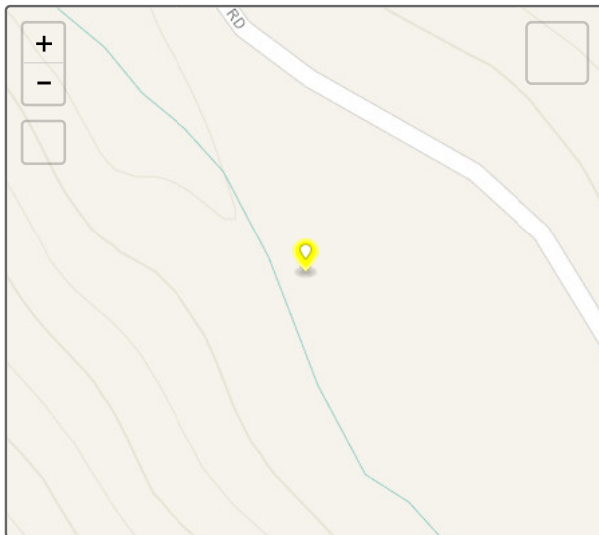

Project Themes

- Habitat and Species
- Healthy Watersheds
- Water

Tracker tells stories at a broad-brush level. Individual project performance measures and expenditures should not be relied upon for complete and total accuracy and should be confirmed with a project's lead implementer. Project locations subject to confidentiality provisions under state and federal law specify the location of a local conservation district or USDA service center office.
